Office Action Summary

Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-24, drawn to a process for preparing a food product, classified in class 426, subclass 302.
 - II. Claims 25-31, drawn to a food product, classified in class 426-subclass 92.
2. The inventions are distinct, each from the other because:
3. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process, e.g. a process wherein the food product is coated by dipping or spraying without a prior vacuum tumbling step.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1761

6. A telephone call was made to Mr. White on February 11, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arthur Corbin whose telephone number is (571) 272-1399. The examiner can normally be reached on Tuesday-Friday from 10:30 am to 8:00 pm.
